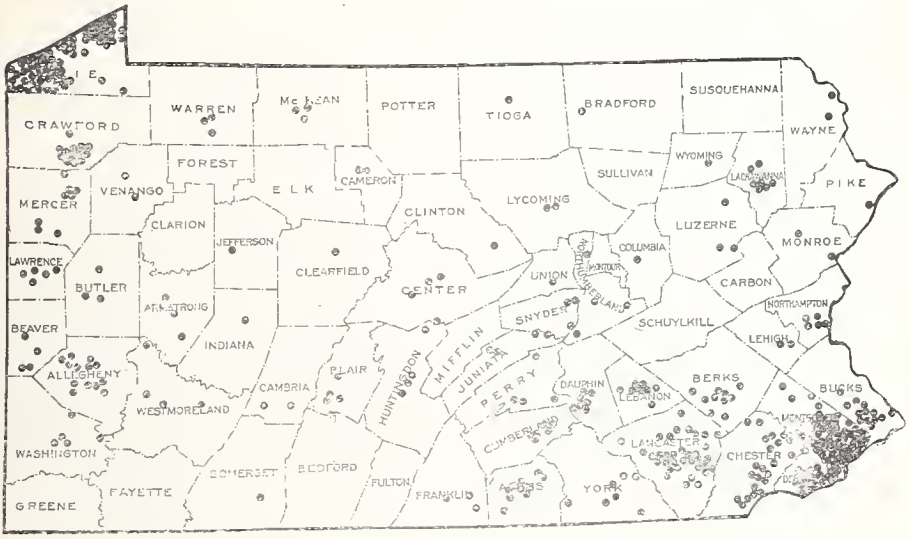
BULLETIN
PENNSYLVANIA DEPARTMENT OF AGRICULTURE
HARRISBURG, PA.

Vol. 12 MAY 1, 1929 No. 6

General Bulletin No. 475

LICENSED NURSERYMEN IN PENNSYLVANIA



Location of Licensed Nurseries in Pennsylvania

C. G. JORDAN. *Secretary of Agriculture*
R. H. BELL. *Director, Bureau Plant Industry*

Published monthly by direction of the Secretary. Entered as second class matter, March 22, 1918, at the Post Office at Harrisburg, Pa., under the Act of June 6, 1900. Accepted for mailing at special rate of postage provided for in Section 1103, Act of October 3, 1917, authorized on June 29, 1918.

THE NURSERY INDUSTRY IN PENNSYLVANIA

There are approximately 480 licensed nurseries in Pennsylvania whose 6000 acres of growing nursery stock are annually inspected by the nursery inspection service of the Pennsylvania Department of Agriculture. These State inspections are made to discover insects and diseases which may be present. Diseased or insect infested stock is cleaned-up or eliminated from the nurseries under the supervision of the State inspector. Every effort is made to insure the cleanliness and freedom from diseases and insects of stock before licenses to sell are issued.

The climate of Pennsylvania is such that both southern grown and northern grown species do extremely well in the State. This makes it possible for Pennsylvania nurserymen to acclimate northern and southern grown species for the needs of buyers within the State. Therefore persons wishing northern or southern plant species need not go outside the State for such stock. Securing this stock from Pennsylvania nurseries is a good guarantee of the adaptability of these varieties to Pennsylvania conditions.
